

Using KDDKeyboardSetter

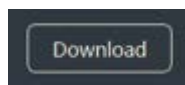

1. Unzip contents of ZDDKeyboardSetter zip file to where you want the software to be used from.
2. Plug in the key you want to programme
3. Start the software – double click on ZddKeyBoardSetter icon

4. Choose Key2 then click on CTRL then Enter keys on the software window
5. The screen will then show (LCTRL + Enter)

6. To set the key click on Download

7. Your Key is now set so that when pressed it will send CTRL+Enter to the Kinovea software
8. Disconnect the Key and it is ready to use
9. You can Save this setup for future use by clicking on Save and Re load it using Load
